## SUMMARY REPORT OF THE EVENT

### ADC-2204: 3D ORTHODONTICS

Developments in computer-aided design and three-dimensional (3D) printing have revolutionized the workflow for orthodontic applications. The revolution that the bracket, arch wires, nasopalveolar molding devices, orthognathic surgical splints, removable appliances, expansion appliances, clear aligner, retainers, auxiliary attachments, and working models can all be made with 3D printers has made the work easier. The 3D printer is now a technology that is easily accessible to orthodontists, increasing the production of different customizable appliances and promising a transition to a digital clinical workflow in the future. Dr.Ojass Kumar has many years of teaching experience. His expertise in the field of Orthodontics and pronounced knowledge has guided the students to better level. Sir has many publications. He is a renowned speaker. Student is expected to learn the applications of modern 3D techniques in orthodontic treatments
