SUMMARY REPORT

ADC-1901: CLINICAL PRACTICE MANAGEMENT

Clinical Practice Management is a complete different concept. It requires effective practical knowledge and skills through hands-on management to succeed in leading a dental team. The dental curriculum needs to incorporate the principles of practice management. Studies have stated that the students are not confident to start or pursue private practice, especially at the start of their careers. Therefore, practice management workshops can guide the students in establishing and running successful dental practice for years. The Department of Public Health Dentistry wanted to organize the workshop for final year students to help them understand about the issues dealt in day to day clinical practices Resource person: Dr. Rajeswari is an experienced faculty and has successful clinical practice. This topic was chosen for students to acquire knowledge about successful clinical practice, to develop understanding of practical learning, to learn the subject based on clinical simulation and to obtain early understanding of clinical based situations.
