**REPORT OF THE EVENT**

11-12-22

**INTRODUCTION:**

A Learning Management System (LMS) is a software application or platform designed to facilitate the management, delivery, and tracking of educational courses, training programs, or learning content. LMS platforms are commonly used in educational institutions, corporate training settings, and other organizations to streamline the administration and delivery of learning materials.

**OBJECTIVES:**

General objective: to provide a comprehensive platform for managing, delivering, and tracking learning experiences, courses, and educational content

Specific objectives:

- Offering a centralized repository for storing and organizing learning materials, including course content, lectures, presentations, videos, documents, and assessments.
- Ensuring that learning materials and resources are easily accessible to learners anytime, anywhere, using various devices such as computers, tablets, and smartphones.
- Providing tools for creating, administering, and grading assessments, as well as offering timely feedback to learners to monitor progress, evaluate performance, and support continuous improvement.

**REPORT OF THE EVENT**

24-04-23

**INTRODUCTION:**

Research methodology refers to the systematic process used by researchers to conduct a study, gather data, analyze findings, and draw conclusions. It encompasses the overall approach and techniques employed to address research questions or hypotheses effectively.

**OBJECTIVES:**

General objective: to provide a systematic framework for conducting research studies, which enables researchers to address research questions or hypotheses effectively and contribute to the body of knowledge in their respective fields

Specific objectives:

By following a rigorous research methodology, researchers can ensure the credibility, validity, and reliability of their findings, contributing to the advancement of knowledge in their respective fields.

The objective is clear, measurable, and actionable, providing a specific direction for conducting research in dental PG studies.

**REPORT OF THE EVENT**

16-11-2021

**INTRODUCTION:**

EBSCO Information Services is a company that provides a range of research databases, e-journals, magazine subscriptions, and other information resources for academic institutions, libraries, corporations, and other organizations. They often offer training programs to help users make the most of their services and products.

**OBJECTIVES:**

General objective: EBSCO typically provides online tutorials covering various aspects of their products and services. These tutorials may be in the form of videos, interactive modules, or written guides.

Specific objectives:

- For larger institutions or organizations, EBSCO might offer on-site training sessions tailored to the specific needs and interests of the participants. These sessions could include hands-on workshops, demonstrations, and personalized guidance.
- EBSCO typically provides comprehensive documentation and user guides for their products and services. These materials can serve as valuable references for users to consult as needed.

## REPORT OF THE EVENT

29-04-2022

### INTRODUCTION:

Research methodology plays a critical role in guiding the research process and ensuring that research studies are conducted systematically, ethically, and rigorously, leading to valid and reliable findings

General objective: It encompasses the techniques, procedures, and tools used by researchers to gather, analyze, and interpret data in order to answer research questions or test hypotheses effectively.

#### Specific objectives:

- Outlining the overall plan or strategy for conducting the research study. It includes decisions about the type of research (e.g., qualitative, quantitative, mixed-methods), the research approach (e.g., experimental, observational, correlational), and the specific methods and techniques to be used.
- Involve writing research reports or articles for publication in academic journals, presenting findings at conferences, or sharing results with relevant stakeholders through other means.

**REPORT OF THE EVENT**

22-02-2020

**INTRODUCTION:**

Regression modeling in dentistry involves using statistical techniques to analyze the relationship between one or more predictor variables and a response variable related to dental health or treatment outcomes.

General objective: regression modeling is a valuable tool in dentistry for analyzing complex relationships between predictor variables and dental outcomes, facilitating evidence-based practice and improving patient care.

Specific objectives:

- Regression modeling in dentistry can inform clinical decision-making, treatment planning, and preventive strategies. It allows dentists and researchers to identify risk factors for oral diseases, evaluate the effectiveness of interventions, and tailor treatment approaches to individual patient characteristics.
- It's essential to validate regression models to ensure their reliability and generalizability. This may involve assessing model fit, checking for multi collinearity among predictor variables, evaluating residuals for homoscedasticity and normality, and testing for interactions or nonlinear relationships.
