## REPORT OF THE EVENT

16-09-2021

### INTRODUCTION:

Computers play an integral role in daily life across various domains, revolutionizing how we work, communicate, learn, and interact with the world. They have become indispensable tools in modern life, empowering individuals, businesses, and societies to accomplish tasks, solve problems, and access information with unprecedented speed, efficiency, and convenience.

### OBJECTIVES:

General objective: To enhance efficiency, convenience, and connectivity in various aspects of human activities, spanning work, communication, learning, entertainment, and more.

Specific objectives:

- Computers provide convenience by offering access to information, services, and entertainment anytime, anywhere.
- Computers aim to streamline tasks and processes, allowing individuals to accomplish tasks more quickly and with greater accuracy. They automate repetitive tasks, perform complex calculations, and provide tools and software that optimize workflows in various domains.

## REPORT OF THE EVENT

09-07-2020

### INTRODUCTION:

The computer and internet era, also known as the digital age or information age, refers to a period marked by the widespread adoption and integration of computers, digital technology, and the internet into various aspects of society. The computer and internet era began with the popularization of personal computers in the 1980s

General objective: the computer and internet era has ushered in unprecedented connectivity, innovation, and opportunities, fundamentally reshaping how individuals, businesses, and societies operate and interact in the modern world.

### Specific objectives:

- With increased connectivity and reliance on digital technology comes the challenge of cybersecurity. Cyberattacks, data breaches, and privacy concerns have become prevalent issues, prompting the need for robust cybersecurity measures and regulations.
- the knowledge and skills needed to navigate the digital landscape, access educational and economic opportunities, and participate fully in the digital age.

**REPORT OF THE EVENT**

09-08-2018

**INTRODUCTION:**

Computers play a significant role in dentistry, revolutionizing various aspects of dental practice, education, research, and patient care. To utilize practice management software to streamline administrative tasks such as appointment scheduling, billing, insurance claims processing, and inventory management. These software solutions help improve efficiency, accuracy, and patient communication while reducing paperwork and administrative overhead.

General objective: to allow for remote consultations, diagnosis, and treatment planning between dentists and patients.

Specific objectives:

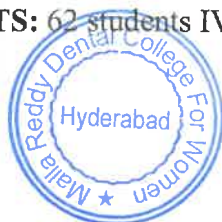

- For dental education and training programs utilize computer-based simulations and virtual reality (VR) technology to provide students with hands-on experience in dental procedures, treatment planning, and patient interactions. These technologies offer a safe and immersive learning environment for aspiring dentists.
- To utilize computer-based multimedia presentations, educational videos, and interactive tools to educate patients about oral hygiene, treatment options, and preventive care. These resources enhance patient understanding, engagement, and compliance with dental recommendations.
